1 Numbers

1 reading numbers:

To read the number, it is divided into thirds

example 156 203

It reads one hundred and fifty-six thousand two hundred and three

1 A man read a phrase in a newspaper: ·One hundred million meters.·

And one hundred thousand dwellings. Numbers are written as follows:

A $10^{4}10, 5$ B $10^{8}10, 5$

C $10^{6}10, 5$ D $10^{5}10, 6$

Answer: B

To read a number, divide by a third by a third

One hundred thousand, 100000, ten thousand, 10000, one thousand 1000

10 million and so on 100 million 10,000,000 $10^{8}10, 5$ one hundred thousand

Legend training

A man read a newspaper phrase, which is ten thousand times

And ten million homes. The numbers are written as follows:

A $10^{4}10, 5$ B $10^{4}10, 7$

C $10^{6}10, 5$ D $10^{5}10, 6$

2 Limited numbers

1 The number of numbers between two numbers:

1 - minor = major

2 The number of enclosed numbers of a number

To another number:

1 + minor = major

3 Number of pages read

1 + minor = major

2 99, 3 How many numbers are enclosed in brown??

A 92 B 93 C 94 D 95

Answer: D

To find the bounded numbers, we substitute into the relatio

Major = - Minor - 1 = 99 - 3 - 1 = 95

Legend training

99, 9 how many are trapped brown?

A 89 B 93 C 94 D 95

3 Muhammad·s rank in the class was 35

How many demands between them? 50 brothers

A 12 B 13 C 14 D 15

Answer: C

The number of students between them is like the numbers bet

minor - major - 1 = 50 - 35 - 1 = 14

Legend training

50 His brother·s rank in the class was 40

How much did he demand between them?

A 9 B 12 C 13 D 14

4 99 to 3? How many?

A 95 B 96 C 97 D 98

Answer: C

To calculate how many to compensate in the relationship

major = - minor + 1 = 99 - 3 + 1 = 97

Legend training

How many 98 to 7?

A 92 B 93 C 94 D 95
