2 Repent Adele

Used during sisterhood R, taking into account the order

-Words- (such as functions numbers)

Example:

$^{5}_{2}$ to Start with the highest number and write two numbers: 4 x 5 = Repent

$^{7}_{3}$ to It started with 5×6×7 = Numbers 3 and we write 7

40 My employees are 3 years old. How can I choose a director and a secretary?

The first shall be a director and the second shall be 8 Randomly

An agent and the third is a secret agent?

A 60 B 96 C 220 D 336

Answer: D

The choice specifies the question function Adele

$^{8}_{3}$ to = 8 x 7 x 6 = 336

Legend training

My employees are among 3. How can I choose a company manager?

The first shall be a director and the second shall be 10 Randomly

An agent and the third is a secret agent?

A 60 B 100 C 220 D 720

3 Combinations

It is used during sisterhood R set of set

Amplify without taking into account the order.

Example: $^{5}_{2}Q = \frac{4 \times 5}{1 \times 2} = 10$

Repent Add in the numerator and denominator the factorial of the number

Bottom $^{8}_{3}Q = \frac{6 \times 7 \times 8}{1 \times 2 \times 3}$ 56=

41 3 employees How many ways to choose a company director

To go to a job meeting? 5 Son Randomly

A 12 B 10 C 8 D 6

Answer: B

My sister I did not respect the order

The question is combinations

$^{5}_{3}Q = \frac{3 \times 4 \times 5}{1 \times 2 \times 3} = 10$

Legend training

How many 4 employees choose a company director?

To go to a business meeting? 6 Ben Randomly

A 22 B 20 C 15 D 6

4 = probability of the event $\frac{\text{Number of times the event occurr}}{\text{The number of elements of the eye sp}}$

42 When you roll a number cube, what is the probability of

4 Greater than?

A $\frac{1}{2}$ B $\frac{1}{6}$ C $\frac{1}{3}$ D $\frac{1}{4}$

Answer: C

Eye space Oh = { 6 , 5 , 4 , 3 , 2 , 1 }

= 4 Event = a number greater than { 6 , 5 }

Probability = $\frac{2}{6} = \frac{1}{3}$

Legend training

5 When throwing a number cube, what is the probability of a

A $\frac{1}{2}$ B $\frac{1}{6}$ C $\frac{1}{3}$ D $\frac{1}{4}$

43 10 to 1 A box containing cards numbered from

I pulled a card from him, so what is the probability of it being

3 Divide by?

A $\frac{1}{10}$ B $\frac{3}{10}$ C $\frac{7}{10}$ D $\frac{1}{2}$
