## 1 Numbers

1 reading numbers:

To read the number, it is divided into thirds

example 156 203

It reads one hundred and fifty-six thousand two hundred and three

1 A man read a phrase in a newspaper: ·One hundred million meters.·

And one hundred thousand dwellings. Numbers are written as follows:

A $10^4$, $10^5$ B $10^8$, $10^5$

C $10^6$, $10^5$ D $10^5$, $10^6$

Answer: B

To read a number, divide by a third by a third

One hundred thousand, 100000, ten thousand, 10000, one thousand 1000

10 million and so on 100 million 100,000000 $10^8$, and one hundred thousand $10^5$

### Legend training

A man read a newspaper phrase, which is ten thousand times

And ten million homes. The numbers are written as follows:

A $10^4$, $10^5$ B $10^4$, $10^7$

C $10^6$, $10^5$ D $10^5$, $10^6$

## 2 Limited numbers

1 The number of numbers between two numbers

= Large - Small - 1

2 The number of enclosed numbers of a number

To another number:

= Large - Small + 1

3 Number of pages read

= Large - Small + 1

2 How many numbers are there between 3 and 99?

A 92 B 93 C 94 D 95

Answer: D

To find the bounded numbers, we substitute into the relatio

= Large - Small - 1 = 99 - 3 - 1 = 95

### Legend training

How many numbers are there between 9 and 99?

A 89 B 93 C 94 D 95

3 Muhammad·s rank in the class was 35

How many demands between them? 50 brothers

A 12 B 13 C 14 D 15

Answer: C

The number of students between them is like the numbers bet

Large - Small - 1 = 50 - 35 - 1 = 14

### Legend training

Mohammed's rank in the class is 40 and his brother's rank

How much did he demand between them?

A 9 B 12 C 13 D 14

4 How many numbers are there from 3 to 99?

A 95 B 96 C 97 D 98

Answer: C

To calculate how many to compensate in the relationship

= Large - Small + 1 = 99 - 3 + 1 = 97

### Legend training

How many numbers are there from 7 to 98?

A 92 B 93 C 94 D 95
